

Project: LSIS online WBL toolkit

Client: LSIS
2007/08

QTP Ltd worked closely with LSIS on the design, piloting, production of learning materials and digital learning resources for phase one and two of the Work-Based Learning online toolkit. QTP also worked with Tintisha Technologies and LSIS to develop quality interactive online resources that would stimulate and support managers in the workplace.

The online work-based learning toolkit was the **winner of a 2009 BETT award** in the category '*Supporting Institutional Leadership and Management Solutions*' and it was reported that:

'Judges found the WBL toolkit an innovative high quality learning interface with easy to use tools. It was commended for an interface model which can easily be used in other mainstream learning areas, it featured a strong theoretical resources set at the right level for teachers, allows staff to undertake high quality training at their own pace and in their own organisation, and was overall very good value for money.'

(Quote from article- see link below)

Characteristics:

- Innovation
- Materials design and development
- Digital learning object design and development
- Research and development
- Piloting and evaluation
- Technology in teaching and learning
- Project management
- Partnership
- Collaboration
- Dissemination
